Post-rehoming survey

* Required

Behaviour questions

The following questions are about the behaviour of the dog. The questions and possible answers follow closely the Observational Assessing Model's behavioural contexts and codes. Answers should be chosen according to 1) the behaviour of the dog since rehoming or since the first survey was carried out, and 2) the highest 'severity' code seen during that time period.

For example, if the dog had shown aggression to people in the house on one occasion, a Reactive to People Aggressive code should be chosen.

Extra information can be included in the comment boxes.

This information is required (shown by stars) unless otherwise shown.
